EDUCATION

The Ohio State University

Bachelor of Science - Computer Science and Engineering
Specializing in Software Engineering

Columbus, OH

Graduation: May 2026

Dean's List: 5 semesters

AWARDS

2nd Place, Fintech Track, IBM SkillsBuild AI Hackathon at OSU (Team X - Solo)

March 2026

- Awarded \$750 for developing an AI-powered meal budgeting and planning platform using IBM Cloud and Gemini.

WORK EXPERIENCE

Product Development and AI Integration Intern

May 2025 - August 2025

NMT Security

Tinton Falls, NJ

- Architected and deployed a full-stack AI chatbot on AWS (Python/Lambda) for security teams, leveraging ChatGPT to speed development workflows and integrating AWS Bedrock for NLU, reducing resolution time by 40% with 95% accuracy across 1,000+ daily queries.
- Automated cybersecurity threat analysis workflows by developing Python scripts integrated with VirusTotal and OTX APIs, reducing manual analysis time by 15 hours per week and significantly improving threat detection accuracy by 30%.

PROJECTS

[BuckeyeMealPlanner](#) | Flask, Gemini 2.5 Flash, IBM Cloud, Docker

March 2026

- Secured 2nd Place (\$750) in the Fintech track at the IBM SkillsBuild AI Hackathon by developing a full-stack app solo.
- Architected an AI-powered platform integrating 7 distinct OSU meal plans with real-time Nutrislice API data across 34 campus dining locations to fully automate and optimize daily student nutrition budgeting and tracking workflows.
- Achieved production-grade reliability by developing a comprehensive suite of 200+ test cases covering API extraction and routing, culminating in a highly scalable, serverless deployment utilizing Docker containers on IBM Cloud Code Engine.

[E-commerce Platform](#) | React.js, Node.js, AWS Lambda, DynamoDB, API Gateway

August 2025 - November 2025

- Architected a serverless microservices backend for 500+ concurrent users to demonstrate distributed computing.
- Decoupled core checkout, payment, and inventory services utilizing AWS Lambda and API Gateway, reducing development time by 40% through modular engineering and decreasing cart abandonment by 25% via optimized UI workflows.

[RecipeShare - Social Recipe Network](#) | Next.js, TypeScript, Go, PostgreSQL, AWS S3/RDS, Tailwind CSS

October 2025

- Built a full-stack social platform with 15+ features (auth, real-time notifications); utilized Cursor AI for rapid prototyping and Gemini for automated security auditing, ensuring production-grade quality and scalable performance for 100+ concurrent users.
- Engineered scalable backend REST APIs using Go and PostgreSQL, implemented JWT authentication, integrated AWS S3 for media storage, and designed responsive UI with Next.js and Tailwind CSS for 100+ concurrent users with optimized query performance.

Real-Time Market Sentiment Analysis Engine | Python, Docker, Kafka, FAISS, React

November 2025

- Engineered a distributed streaming architecture (Kafka, Docker) with Vector Search (RAG); leveraged Perplexity for architectural decision-making and Cursor AI for real-time debugging to deliver sub-second bullish/bearish trend indicators for live financial news.

Core Language Interpreter | Java

January 2025 - April 2025

- Designed and implemented a production-grade interpreter with lexical analysis, parsing, and recursive-descent execution processing 1,000+ lines/sec; incorporated reference-counting garbage collection and syntax checks ensuring 99.9% parsing accuracy for reliable execution.

PeerEval - Academic Assessment Platform | Ruby on Rails 7.2, SQLite3, Bootstrap 5

August 2024 - December 2024

- Developed a full-stack CRUD platform for 200+ students, reducing submission errors by 35%, improving SQL query speeds by 2s/request, and communicating technical progress and performance in presentations to peers and instructors throughout the development cycle.

LEADERSHIP & INVOLVEMENT

The Quantum Computing Club at Ohio State | Founder and President

March 2025 - present

- Launched the university's first quantum computing organization by leading entrepreneurial and outreach efforts, building cross-functional relationships with faculty and student groups, recruiting an executive board, and expanding membership through targeted initiatives.

Student Life | The Ohio State University | Resident Advisor

August 2024 - present

- Led community-building for diverse residents, boosting participation by 40% through 15+ events; maintained a 95% satisfaction rate by fostering an inclusive environment and resolving 10+ conflicts with empathetic outreach.

SKILLS

AI-Assisted Development: Prompt Engineering, Workflow Automation, Code Review & Auditing, RAG Implementation.

Programming Languages: Java, Python, JavaScript (Node.js, React, Next.js, TypeScript), Go, Ruby, SQL, HTML, C

Frameworks/Libraries: Node.js, React, Next.js, Ruby on Rails, Tailwind CSS, TensorFlow, OpenCV, NumPy, Agile

Cloud & Tools: AWS (Lambda, Bedrock, Lex, S3, RDS, EC2, DynamoDB, API Gateway), GitHub, Eclipse, MySQL, PostgreSQL, SQLite3

Certifications: "Certified AI Practitioner" by AWS, "Certified Cloud Practitioner" by AWS

Research Paper: "Fake News Detection using Machine Learning and Natural Language Processing," 2021 ICTAI (22 citations).
